

Forklift Electrical Part

Forklift Electrical Parts - Lift trucks can be purposely marked to be utilized in dangerous places. A marked forklift indicates the design has met the minimum requirements of ANSI/UL 558 utilized for engine powered lift trucks or ANSI/UL 583 meant for electric lift trucks for the type of label placed.

The application for labels intended for lift forklifts could be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Ask your local insurance provider and Fire Marshall for additional information on the approved uses of industrial powered trucks in your application.

If the particular lift truck meets the outlined standards, labels can be put. A labeled forklift would show the type of designation located on the nameplate and will have a correctly corresponding label placed.
