

Clark Forklift Parts

Clark Forklift Parts - At present, there are no less than 350,000 Clark forklifts performing worldwide, and more than 250,000 operating in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 distinctive brands of forklifts, with parts covering more than 120,000 particular components for all of its automated equipment. Your regional Clark Seller is your complete source for availability of all your components needs provided by Clark Totalift.

Clark has a exceptional Parts Supply team. The parts warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Internationally, Clark has one of the most outstanding supplier support networks. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their clients predominates the material handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, pioneering protection features such as the worker restraint system. This exceptional dedication to safety is at this time a standard feature on every lift truck.

Clark's relentless goal to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck manufacturer across the globe to be certified with the internationally approved quality standard ISO 9001 for each and every one of their manufacturing plants. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant market position.

Clark has chosen the structure of "Lean Production" at all of its assembly plants because this method is particularly economical and allows for minimal use of resources. Developed to ensure maximum efficiency, this system is designed to find and acknowledge the most effective methods for production facility management. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

By working together, Clark's product suppliers and engineers communicate towards enhancing product proficiency while minimizing expenses. The contemporary value engineering agenda combines modern product growth and delivers superior consumer support and service within the industry.
